Zhongyu Energy Successfully Completes Its First International LNG Trade, Marking a Significant Step in Its Global Expansion

(15 July 2025, Hong Kong) – **Zhongyu Energy Holdings Limited** and its subsidiaries (collectively the “**Group**” or “**Zhongyu Energy**”; stock code: 03633.HK) is pleased to announce the successful delivery of the Group’s first international liquefied natural gas (LNG) trade, which recently took place at Sakai Port, Japan. This milestone signifies a breakthrough in Zhongyu Energy’s global energy trading footprint and lays a strong foundation for the Group’s deepened presence in international markets and the establishment of a global resource allocation network.

In this transaction, Zhongyu Energy demonstrated its comprehensive professional capabilities across the entire process, including market analysis, project evaluation, cross-border negotiations, logistics coordination, and risk management. The efficient collaboration and seamless execution of each phase highlight the Group’s professionalism and operational excellence in navigating complex international environments. This achievement also establishes a replicable and scalable operational model for the Group’s future international business endeavors.

The successful delivery not only expands Zhongyu Energy’s international natural gas sourcing channels but also significantly enhances its resilience to energy market volatility. It further underscores the team’s exceptional expertise in international market development, cross-border resource integration, and global supply chain management. This historic breakthrough officially positions Zhongyu Energy as a participant in the international LNG trade and has garnered widespread recognition in the global market, injecting new momentum into the Group’s overall competitiveness.

Looking ahead, Zhongyu Energy will continue to leverage its strengths, actively participate in the global energy market, support the development of Chinese energy enterprises on the international stage, and contribute to global energy governance.
